

IPTV In-One-Box

by Jamiro Broadcast

Transforming Screens into Smart Experiences

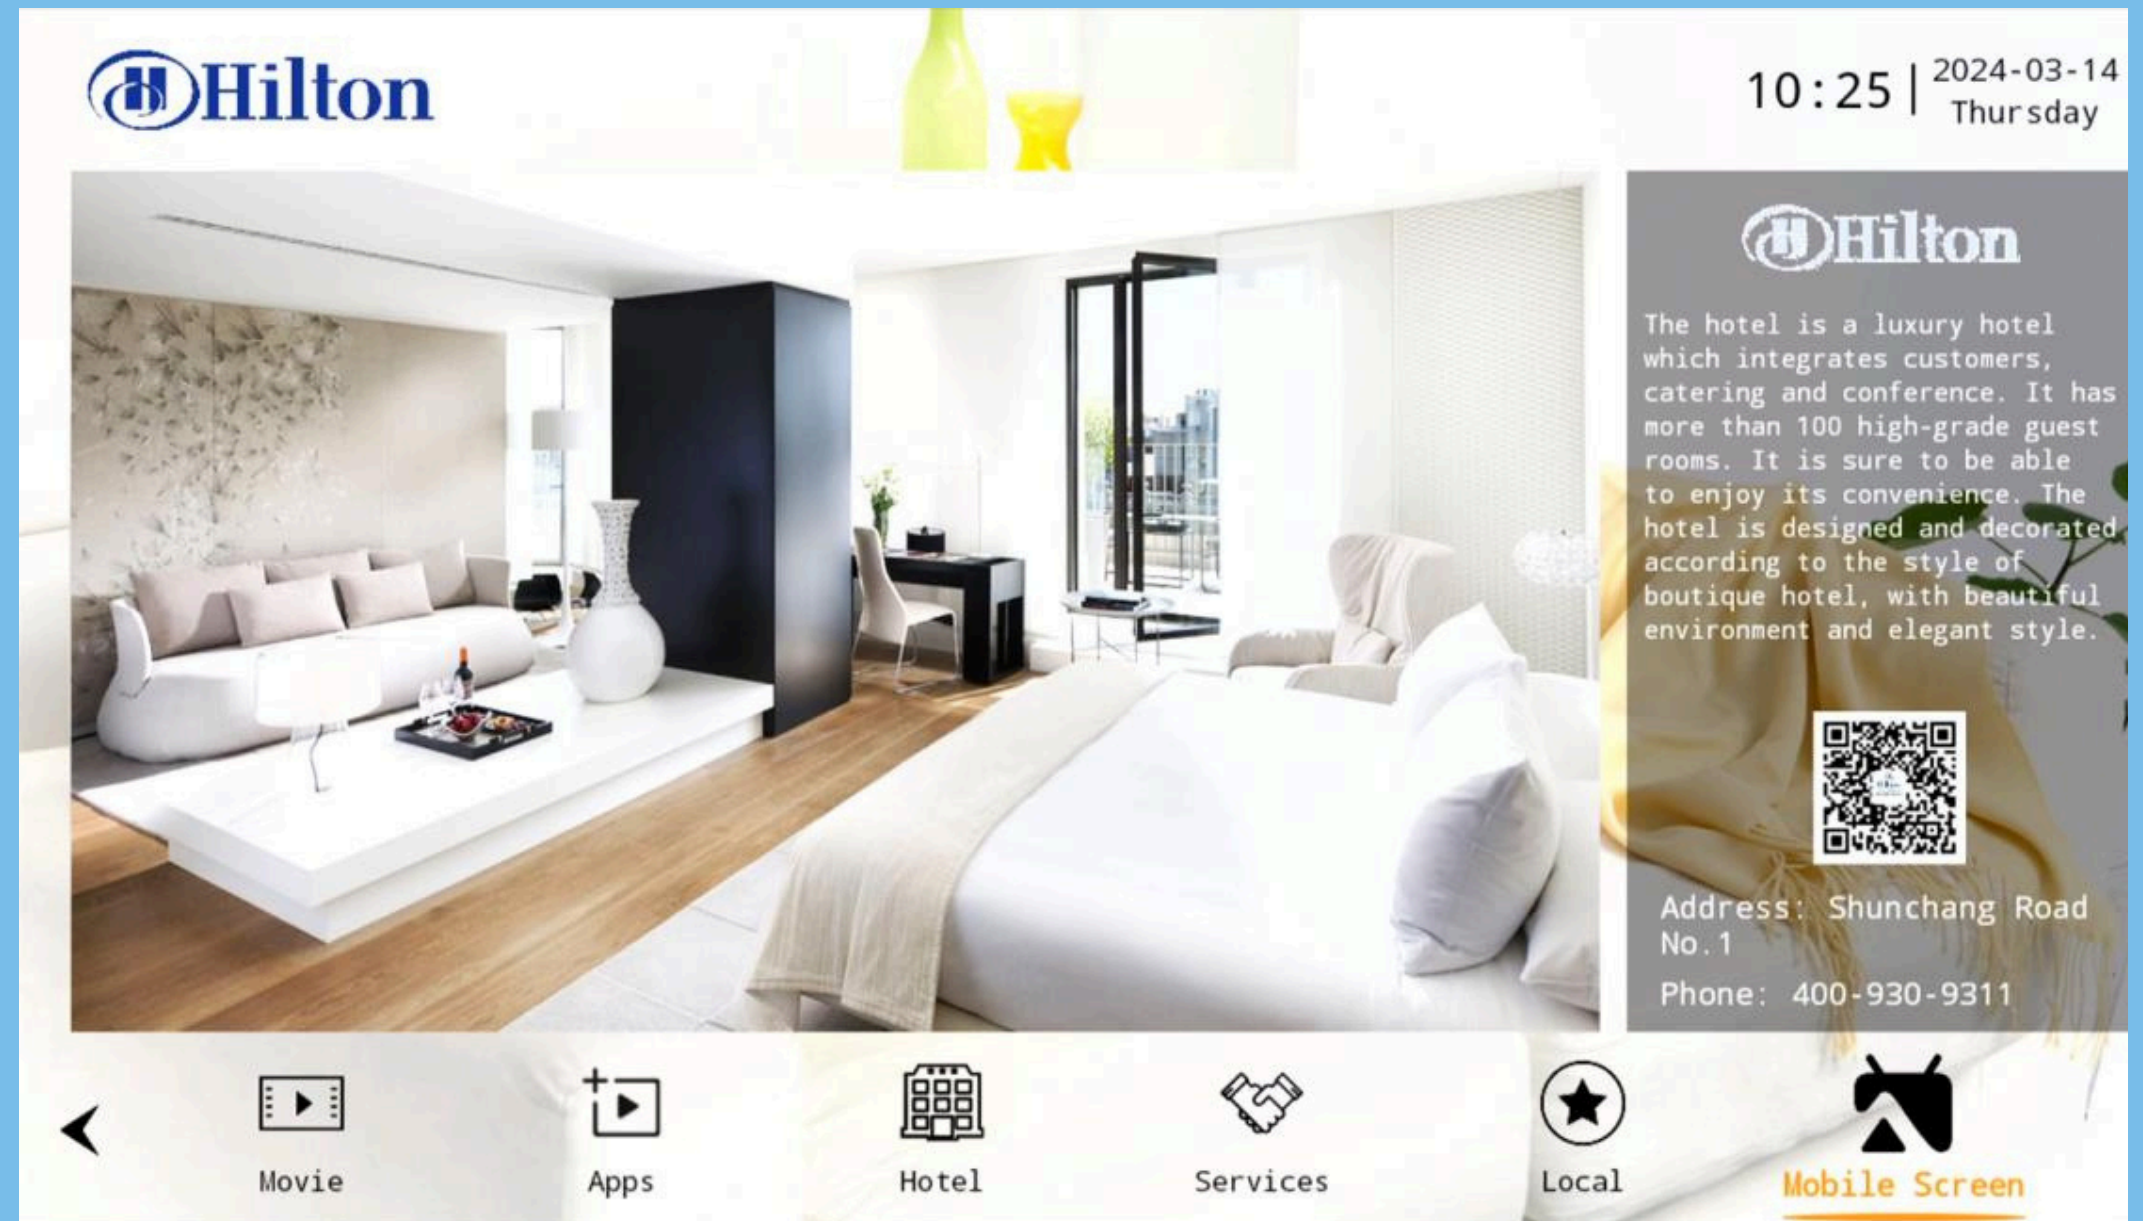

What is IPTV?

IPTV stands for Internet Protocol Television — It delivers TV content over the internet, not through traditional antennas or satellite dishes in every room.

- Like Netflix or YouTube — but customized for your hotel, resort, or facility.
- It turns regular screens into interactive media hubs.
- Guests can watch live TV, movies, or even stream from their phones.

The Challenge

Outdated Systems:

Traditional cable TV systems are inflexible and expensive to maintain

Rising Guest

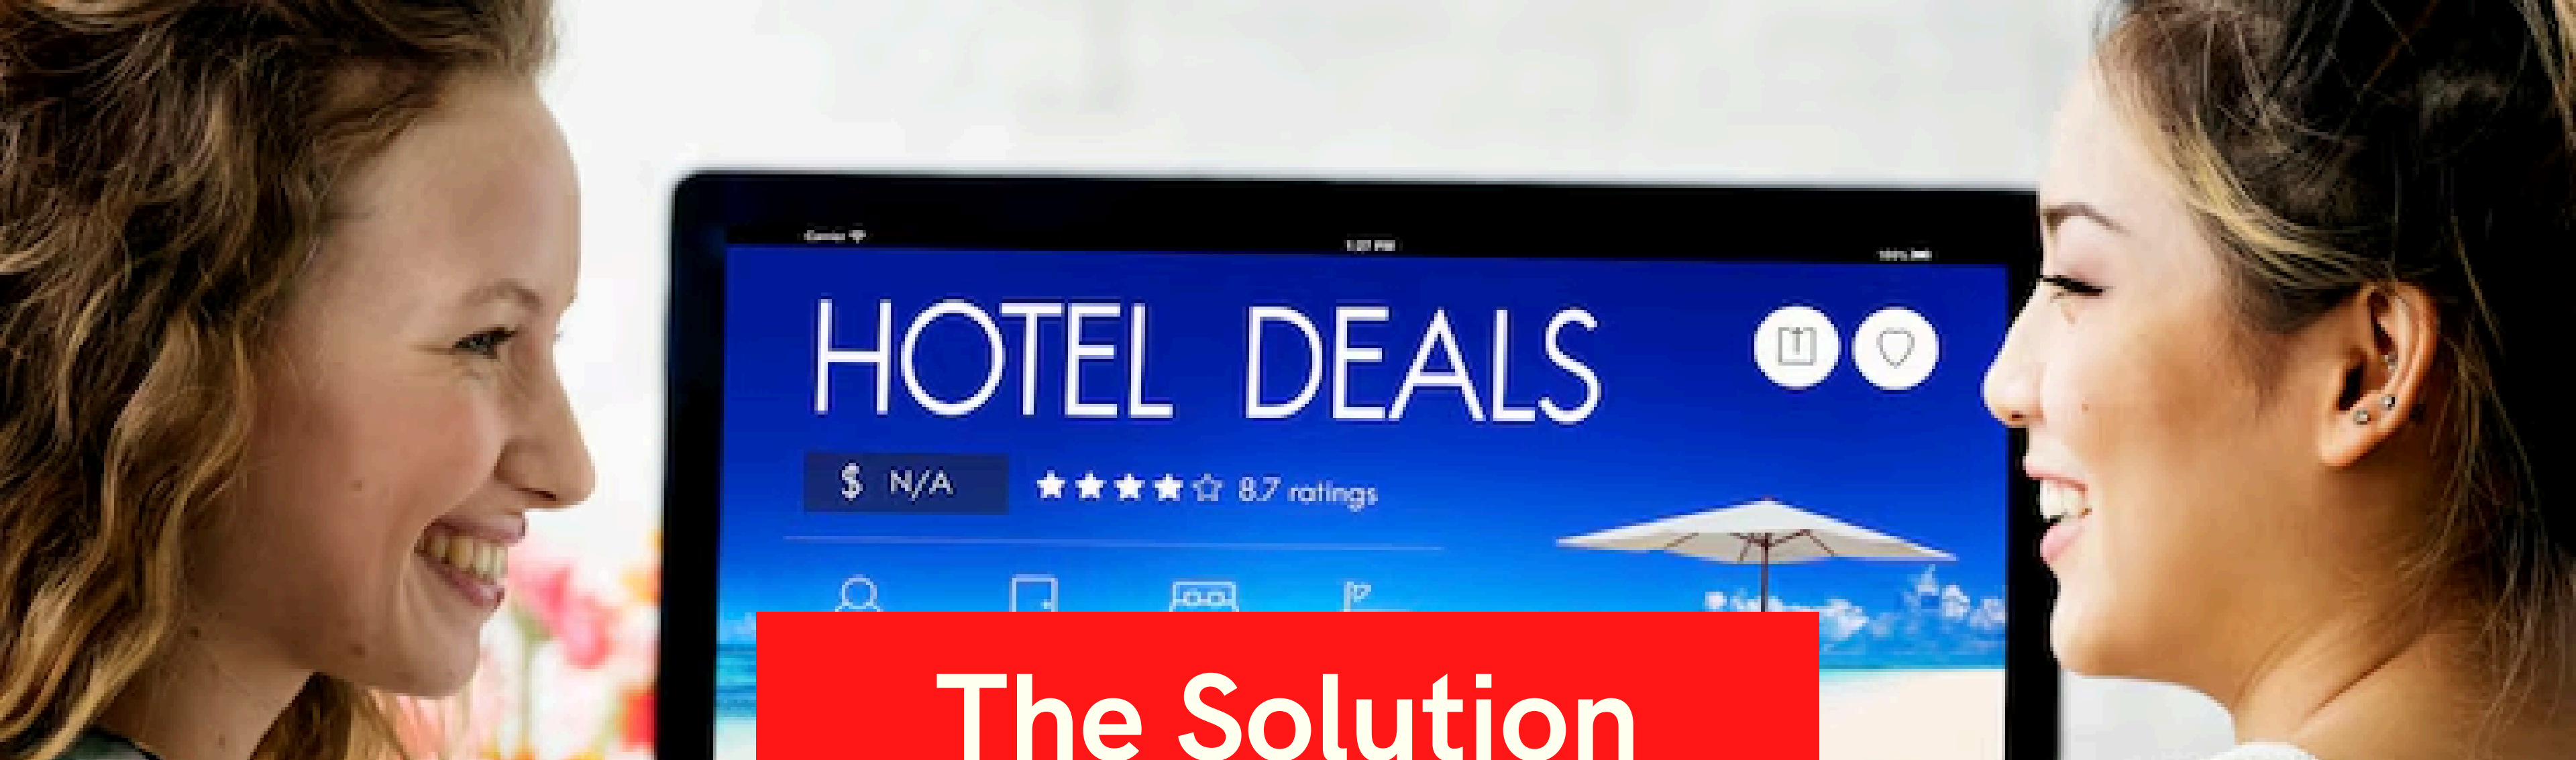

Expectations: Modern travelers expect personalized, on-demand entertainment

Missed Revenue

Opportunities: Conventional TV systems offer limited monetization potential

Complex

Management: Multiple entertainment services create operational inefficiencies

The Solution

Seamless Content Delivery: HD television, on-demand movies, and streaming services

Branded Guest Experience: Customizable interface with your property's branding

Operational Efficiency: Centralized management across your entire property

Revenue Generation: New promotional and advertising capabilities

KEY FEATURES

For Guests:

- Intuitive, hotel-branded user interface
- Live TV with electronic program guide
- Premium movie and content library
- Personal device integration
- Multi-language support
- Personalized recommendations
- PMS integration: Show guest name & billing info on welcome screen

For Management:

- Centralized content management system
- Promotional messaging capabilities
- Room service and amenity integration
- Detailed usage analytics and reporting
- Tiered content packages for different room categories
- Seamless PMS integration

TECHNICAL ADVANTAGES

Enhanced Guest Experience: IPTV allows for personalized content, creating a more engaging experience for guests.

Increased Revenue: Hotels can generate income through pay-per-view movies, in-room dining menus, and advertising on the IPTV platform

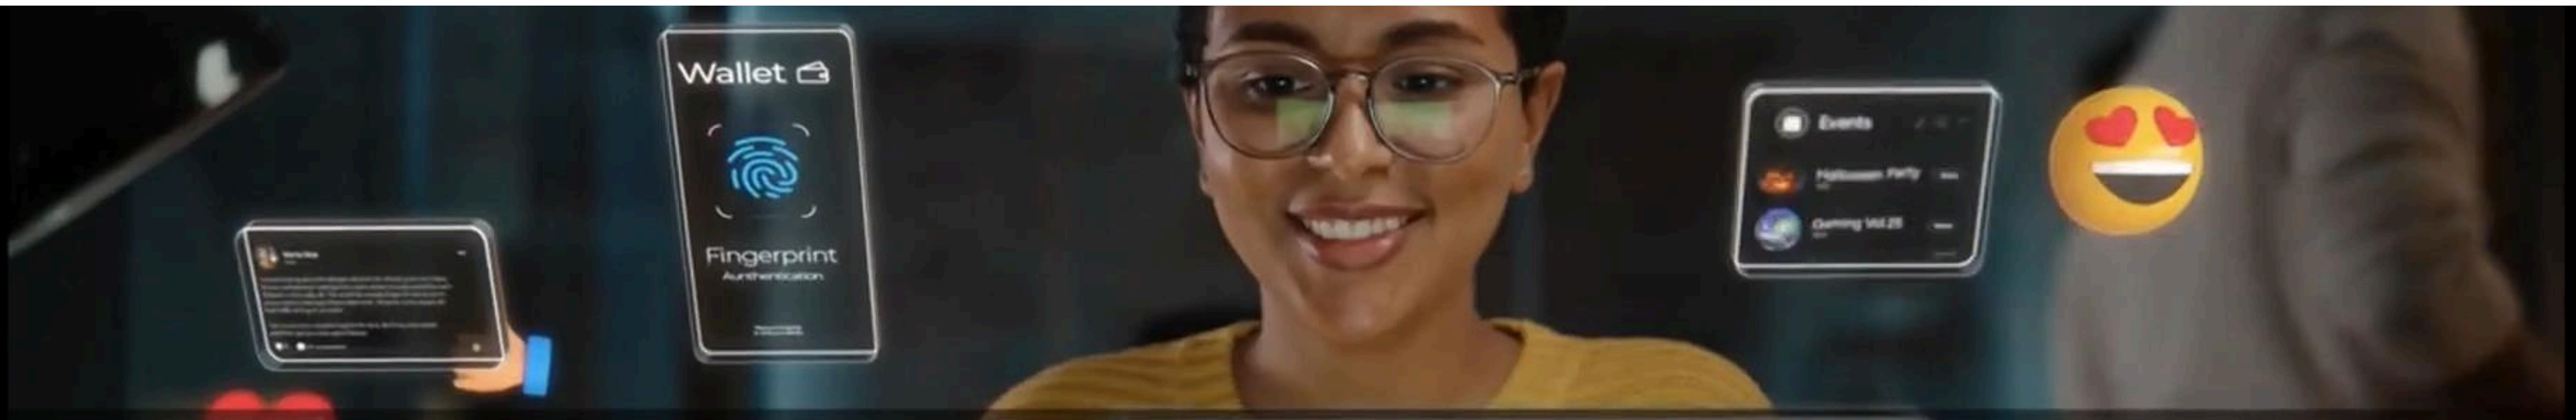

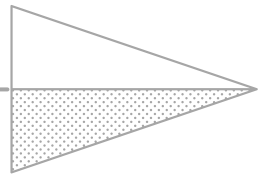

In-Room Promotions: IPTV facilitates the promotion of hotel services and amenities, directly to guests

Property Management System (PMS) Integration: IPTV can integrate with PMS, streamlining operations and providing real-time information about guest preferences and occupancy.

Improved Customer Loyalty: Personalization and a wider range of content choices can lead to increased guest satisfaction and loyalty.

Smart Room
Entertainment

Digital
Signage

Interior
Acoustic
Panels

We set up in-room systems that let guests control lighting, TV, and media from a smart interface, enhancing comfort and convenience.

Value:

- IPTV integration
- Bluetooth music systems
- Voice-controlled or touchscreen interfaces

What it Brings:

- Offers modern, luxurious in-room experience
- Increases guest satisfaction and positive reviews
- Differentiates property from competitors

We install and configure dynamic screens in lobbies and rooms to display real-time info, promotions, and guest messages, all managed from a central system.

Value:

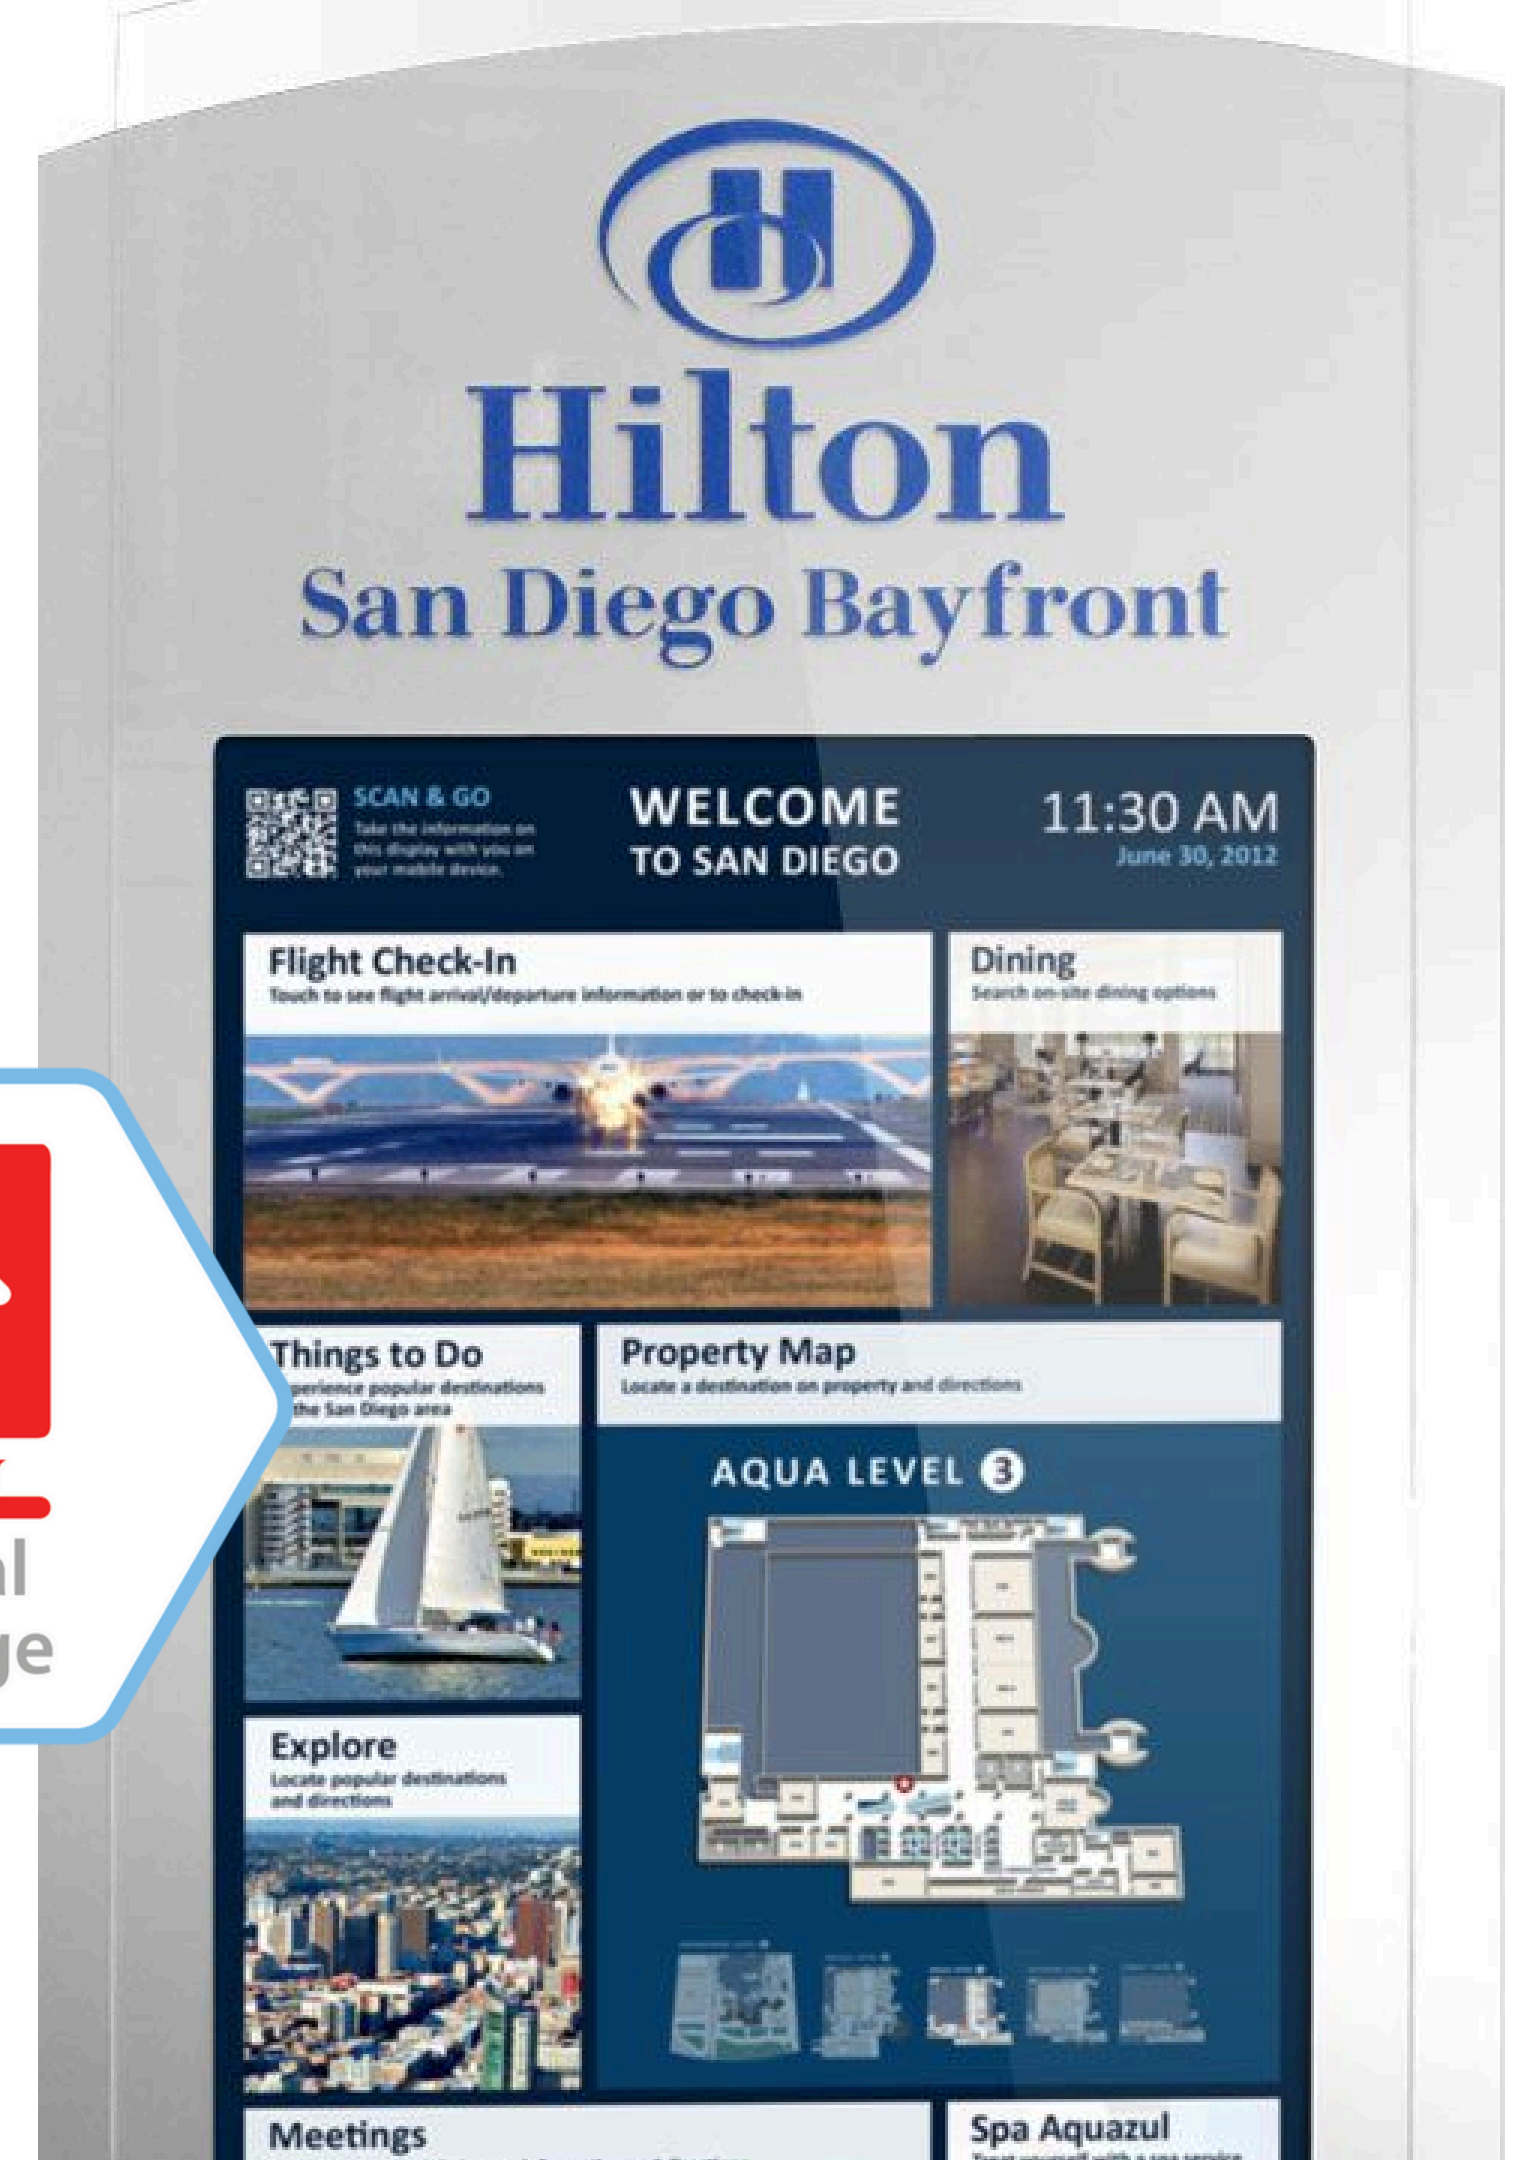

- Show welcome messages, event schedules, weather updates, news, and promotions
- Update content instantly from a central control system
- Reduce printing costs for posters, menus, or guides

What it Brings:

- Improves guest communication
- Promotes hotel services (e.g., spa, restaurant offers)
- Increases revenue through internal advertising

Digital
Signage

We equip meeting rooms with projectors, mics, speakers, and control panels, ensuring professional, plug-and-play setups for corporate events.

Value:

- High-quality microphones, projectors, speakers, and video conferencing tools
- Centralized control for lighting, sound, and displays

What it Brings:

- Attracts corporate events and conferences
- Enhances reputation as a professional, tech-enabled venue
- Boosts revenue through event bookings

We supply and install stylish sound-absorbing panels to improve privacy and reduce noise in rooms, lounges, and conference areas.

Application:

- Guest rooms
- Conference areas
- Lounges and restaurants

What it Brings:

- Creates a quiet, comfortable atmosphere
- Improves acoustics for events and meetings
- Adds a stylish interior design element

Interior
Acoustic
Panels

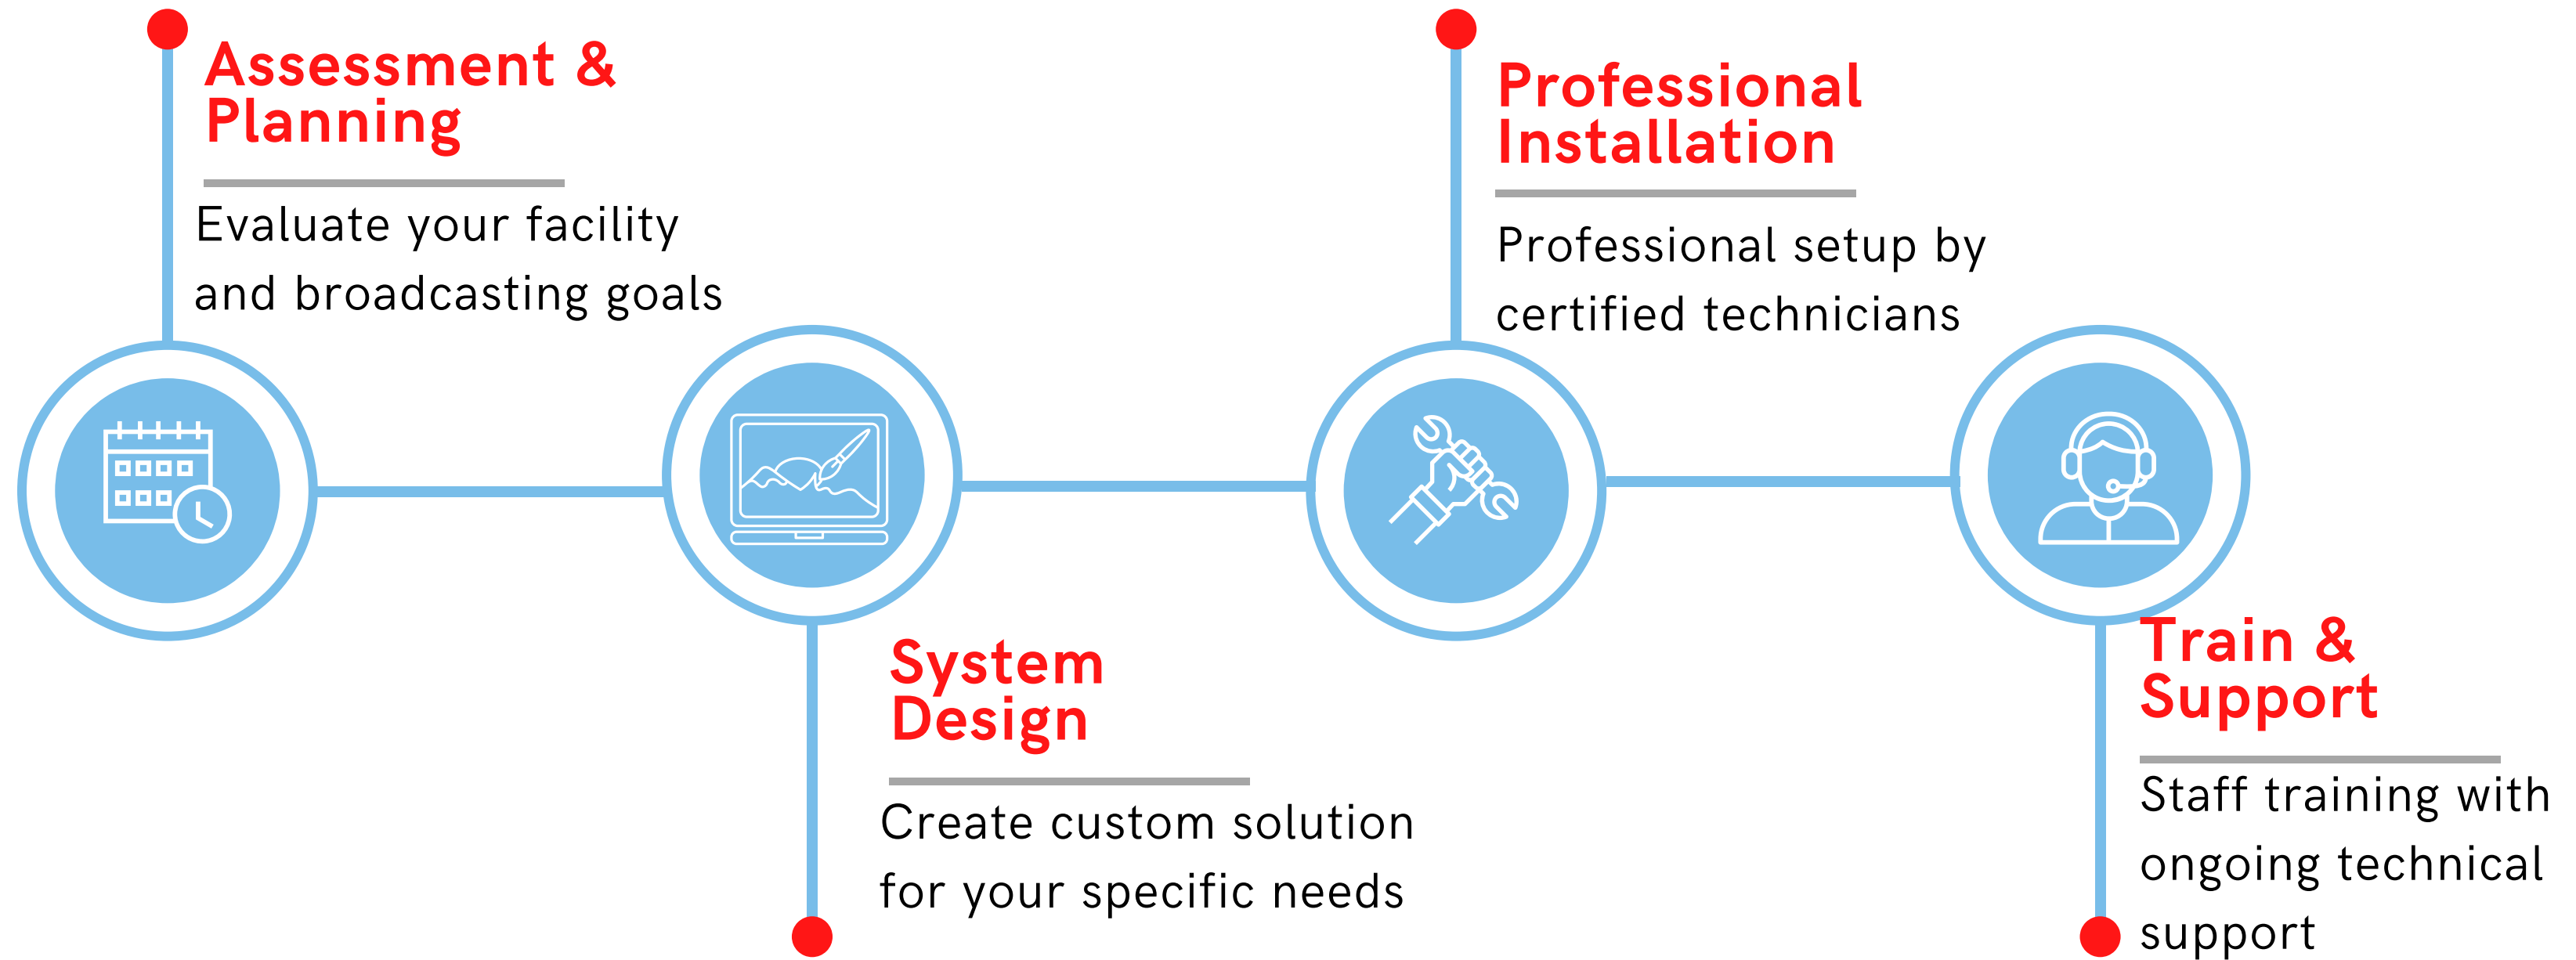

We install fingerprint or facial recognition systems for secure room access and restricted zones fully integrated with your hotel's control systems.

Value to the hotel:

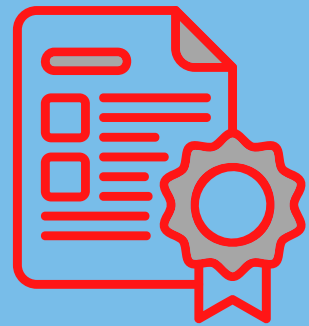

- Enhances safety and privacy for guests
- Reduces reliance on keycards or physical access devices
- Builds trust, especially for high-end and business travelers
