

Hybrid Classroom Solutions

Transforming Education for the Digital Age

Hybrid Classrooms

Jamiro Broadcast designs and installs fully equipped Hybrid Classrooms, learning environments that blend in-person teaching with digital tools for interactivity, recording, streaming, and remote participation.

The Education Challenge

73% of students expect flexible learning options

Remote learning is now a permanent part of education

Digital natives require interactive, technology-rich environments

Hybrid models
Increase accessibility and reach

The Solution

Remote participation
through advanced
technology

Interactive displays
for engaging content
delivery

Smart podiums for
instructor mobility
and control

Multi-device
connectivity for
seamless content
sharing

Our Complete Solution

Three Integrated Components for Educational Excellence

Interactive Smartboards (65"-85")

- 4K Ultra HD resolution with multi-point touch
- Dual OS (Android + Windows) for flexibility
- Wireless screen sharing and real-time annotation

Smart Electric Podium (FK530T)

- Height-adjustable design for instructor comfort
- Integrated control panel for classroom management
- Professional audio/visual integration

Advanced A/V Integration

- HD cameras with intelligent tracking
- Professional audio systems with wireless microphones
- Universal device compatibility

Interactive Smartboard Features

Intuitive touch interface: Write and interact naturally with 20-point accuracy

Wireless presentation: Students and faculty can share content instantly

Flexible operating systems: Android and Windows compatibility for all applications

Crystal clear 4K display: Ensure visibility for all students, in-person and remote

Interactive Smartboard Features

Real-time annotation: Mark up any content for enhanced explanation

PRESENTATION AND ANNOTATION,
ALL AT YOUR FINGERTIPS

Supports writing, page turning, real time annotation, Zoom in and out, mobile roaming, hand gesture eraser and more!

4K Screen

Dual System

10 point touch

Intelligent writing

Wireless pass

Stereo

INTEGRATE 6 FUNCTIONS INTO ONE

Projector / PC / Audio / 4K / Writing whiteboard / Meeting

Projector

Audio

PC

Writing whiteboard

Meeting

4K

Built-in collaboration tools: Camera and microphone array for seamless communication

Available Sizes:

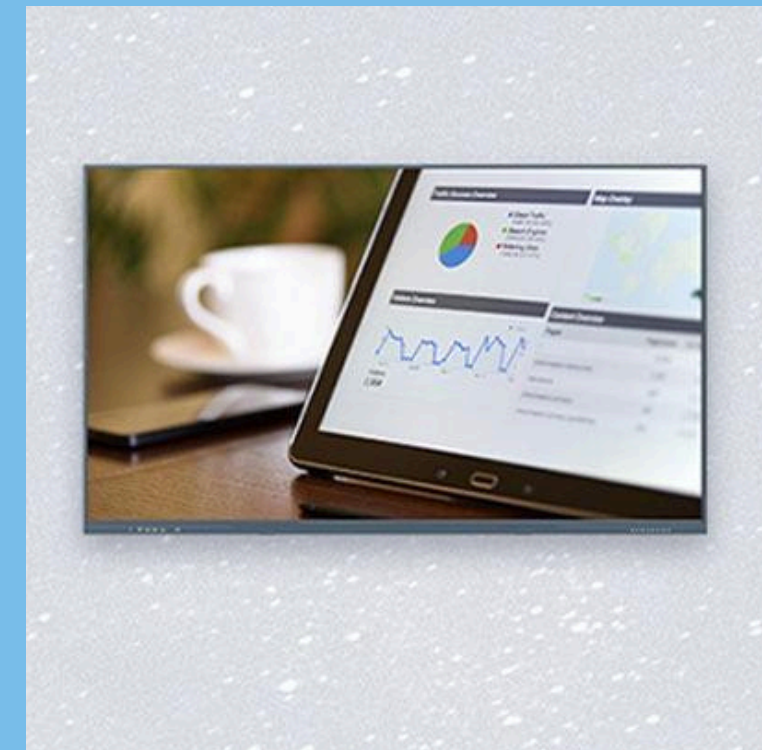

- **65" (AY-WB-065A)** - Ideal for seminar rooms
- **75" (AY-WB-075A)** - Perfect for standard classrooms
- **85" (AY-WB-085A)** - Excellent for large lecture halls

Two Way Installation

Free Standing Mount

Wall Mount

Technical Specifications Overview

Feature	Specification
Display	4K (3840×2160) resolution
Touch Points	20-40 point infrared
Connectivity	HDMI×3, USB×4, Wi-Fi 5G
Audio	2×12W front speakers
OS	Android 13 + Windows 10/11
Lifespan	50,000+ hours

Smart Podium Benefits

Electric height adjustment: 300mm range accommodates all faculty

Integrated technology hub:
Centralized control of classroom systems

Built-in connectivity:
Ready connections for laptops, tablets, and other devices

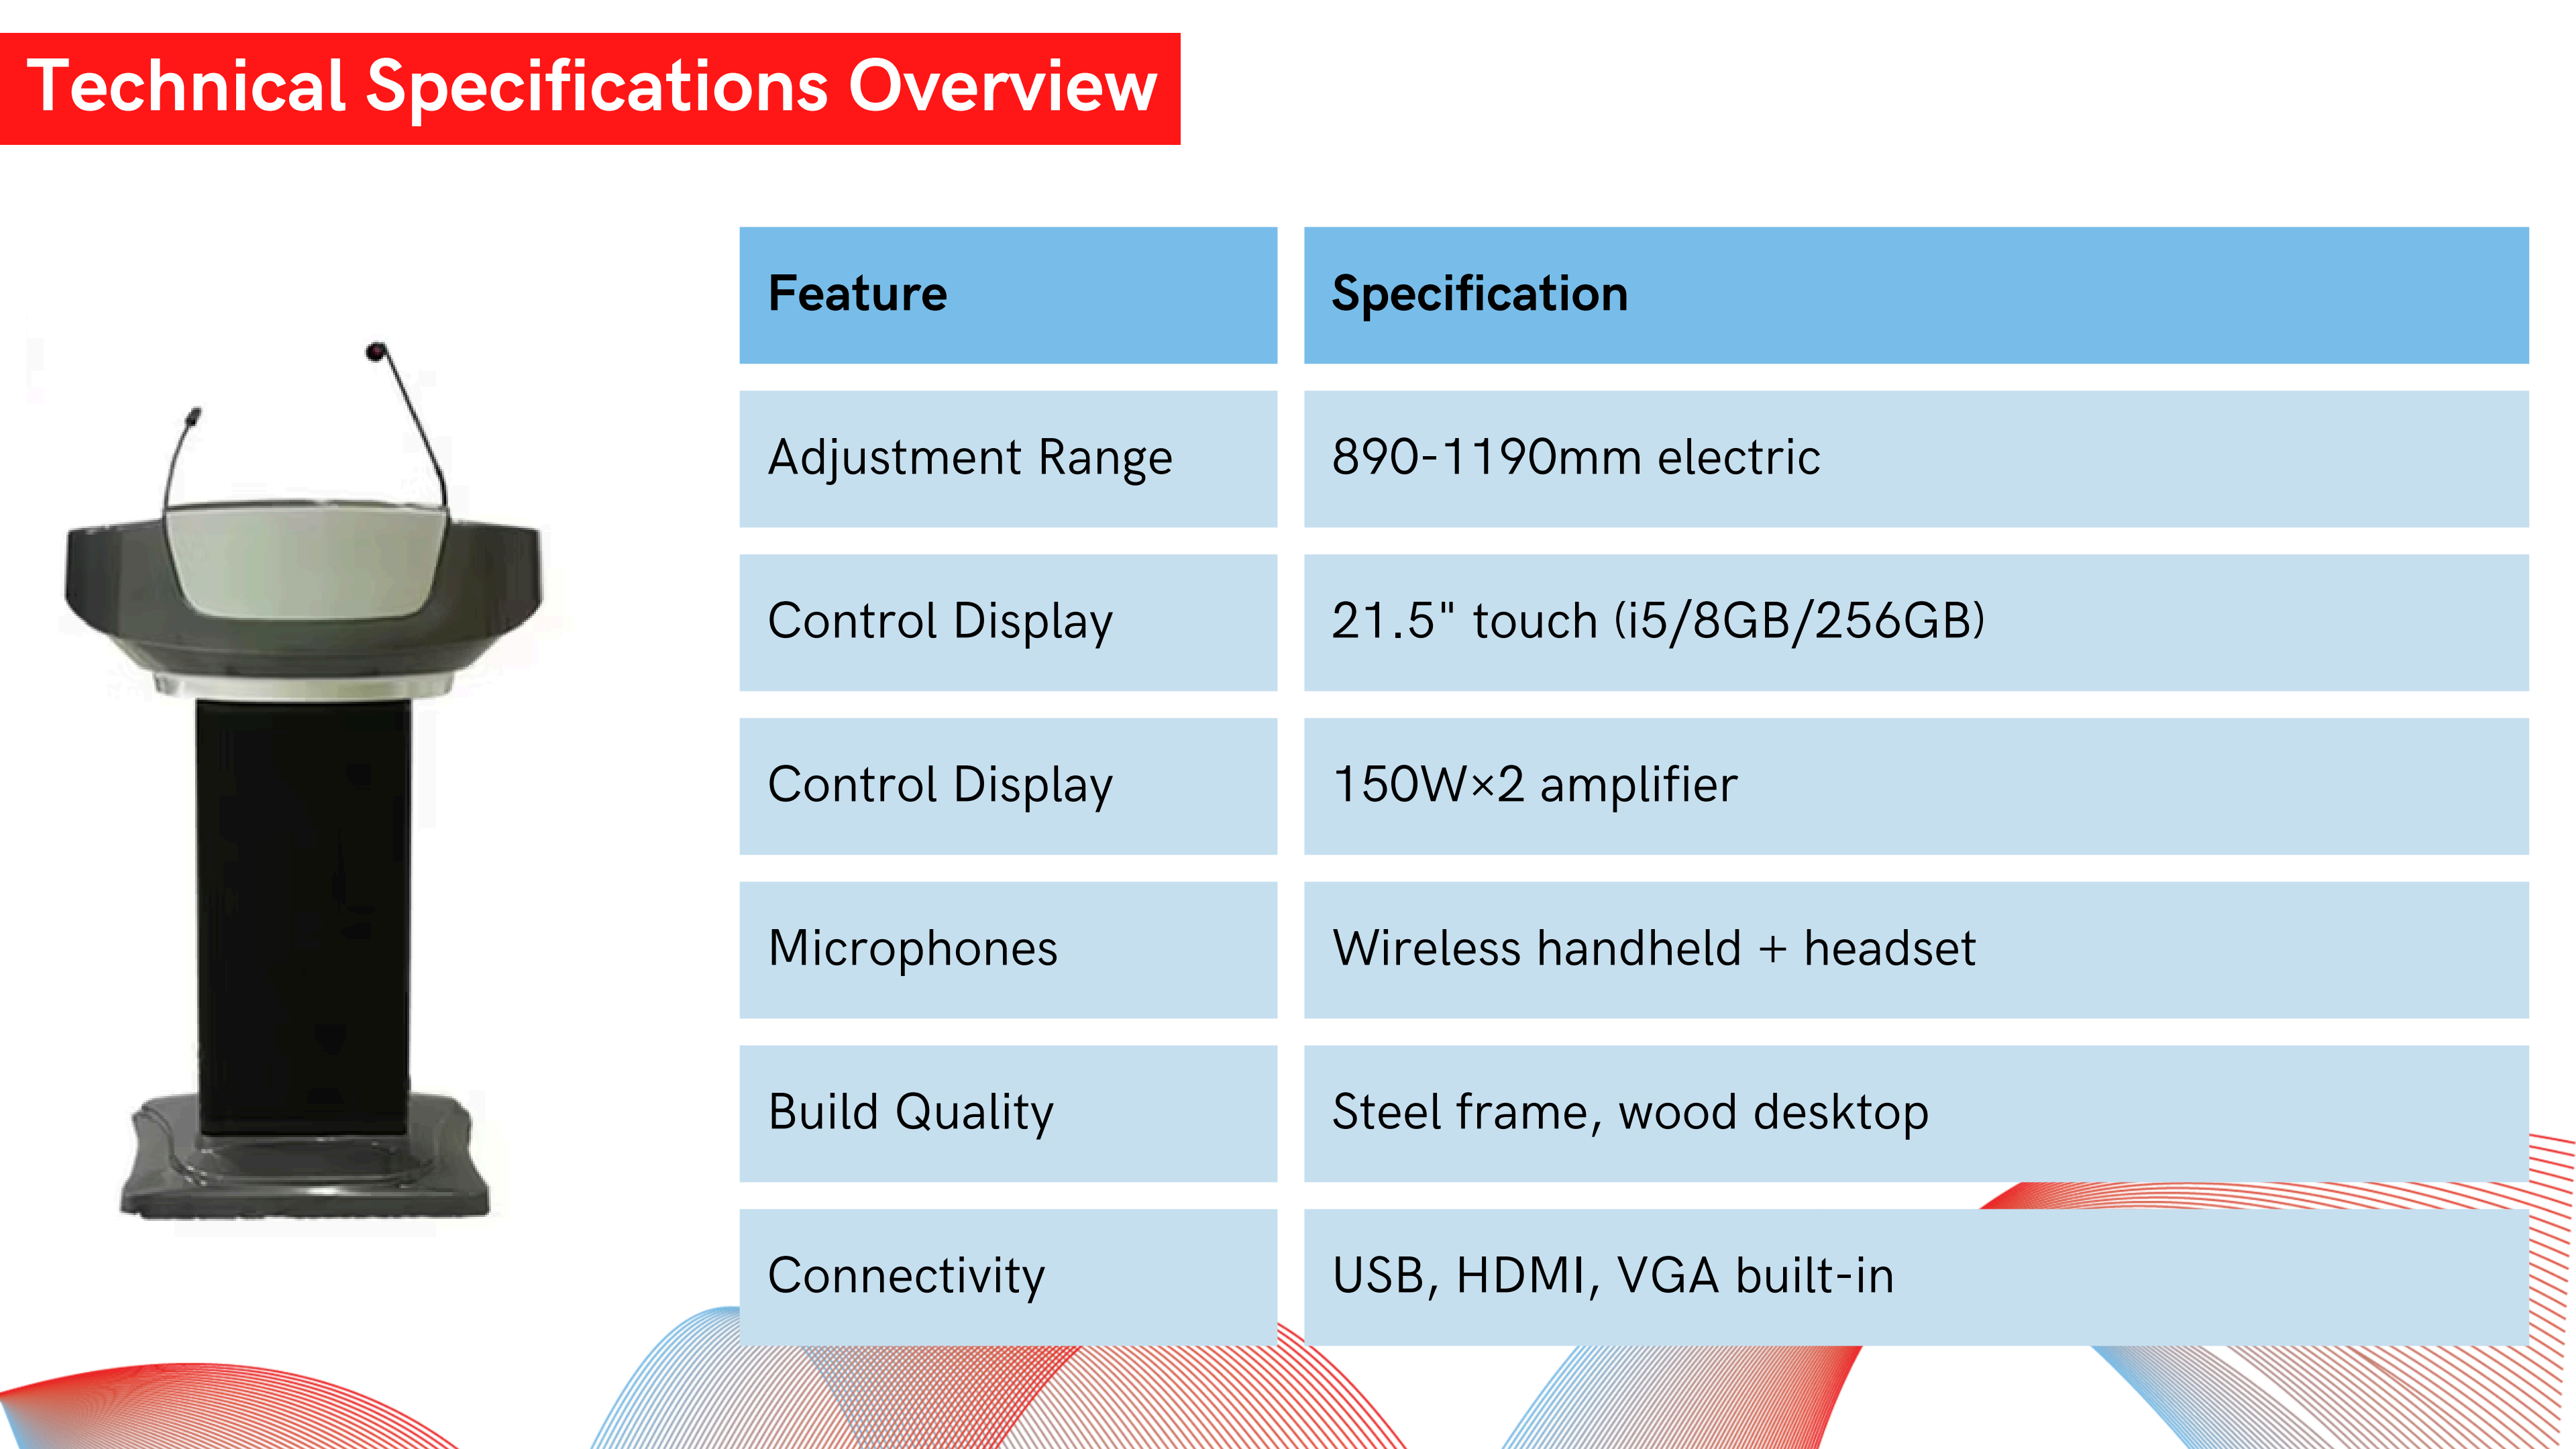

Professional audio system: 150W amplification with wireless microphones

Interactive Smartboard Features

Secure equipment storage: Lockable compartments for valuable technology

Touch control interface: 21.5" display with intuitive controls

Technical Specifications Overview

Feature	Specification
Adjustment Range	890-1190mm electric
Control Display	21.5" touch (i5/8GB/256GB)
Control Display	150W×2 amplifier
Microphones	Wireless handheld + headset
Build Quality	Steel frame, wood desktop
Connectivity	USB, HDMI, VGA built-in

Advanced A/V Integration

Multi-device support: Up to 9 simultaneous connections

Cross-platform compatibility: iOS, Android, Windows, macOS, Chrome OS

Learning management integration: Compatible with popular education platforms

Instant content sharing: QR codes and wireless distribution

Real-time collaboration: Bridge in-person and remote participants seamlessly

Advanced A/V Integration with Hybrid Video Tools

Real-Time Interaction	Remote Access	Increased Flexibility
Students can engage live via chat, questions, and discussion.	Join from anywhere — at home, on campus, or in the field.	Supports all learning styles: live, recorded, or hybrid.

Investment Return

Expand classroom capacity without physical expansion

Attract students seeking flexible learning options

Future-proof technology investment

Schools with hybrid tech are seen as progressive and more attractive to parents and students.

More Solutions for Learning Institutions

Sound
proofing

Campus PA
& Bell
Systems

Campus
Radio & Tv

Campus PA & Bell Systems

We design and install centralized Public Address (PA) and bell systems that connect classrooms, administrative offices, and outdoor spaces. This system enables schools to make clear announcements, broadcast emergency messages, and automate bell schedules for class start/end times and breaks.

Core Features

Zone-based Broadcasting:

Target specific areas (classrooms, dormitories, cafeteria, sports facilities) or broadcast campus-wide

Automated Bell Scheduling:

Programmable class period bells with different tones for various activities

Digital Clock Integration:

Synchronized time display throughout campus with automatic daylight saving adjustments

Emergency Alert

Capabilities: Instant lockdown, evacuation, or weather alert notifications with distinct audio signals

Integration with School

Management Systems:

Automatic schedule adjustments for special events, holidays, or modified schedules

Soundproofing & Acoustic Treatment

Our comprehensive soundproofing solutions address noise pollution, improve speech intelligibility, and create focused spaces that enhance concentration and academic performance.

Wall Panels: Sound-absorbing materials that reduce echo and improve speech clarity

Floor Treatments: Carpet and underlayment systems that reduce impact noise

Ceiling Systems: Suspended acoustic tiles that control reverberation time

Window Solutions: Acoustic glazing and treatments for external noise control

Campus TV & Radio

Jamiro Broadcast designs, installs, and equips on-campus media studios tailored to the needs of schools, colleges, and universities.

Acoustic Treatment

We install soundproof walls, ceilings, and doors using acoustic panels and foam to ensure clear, echo-free recordings.

Radio Studio Equipment

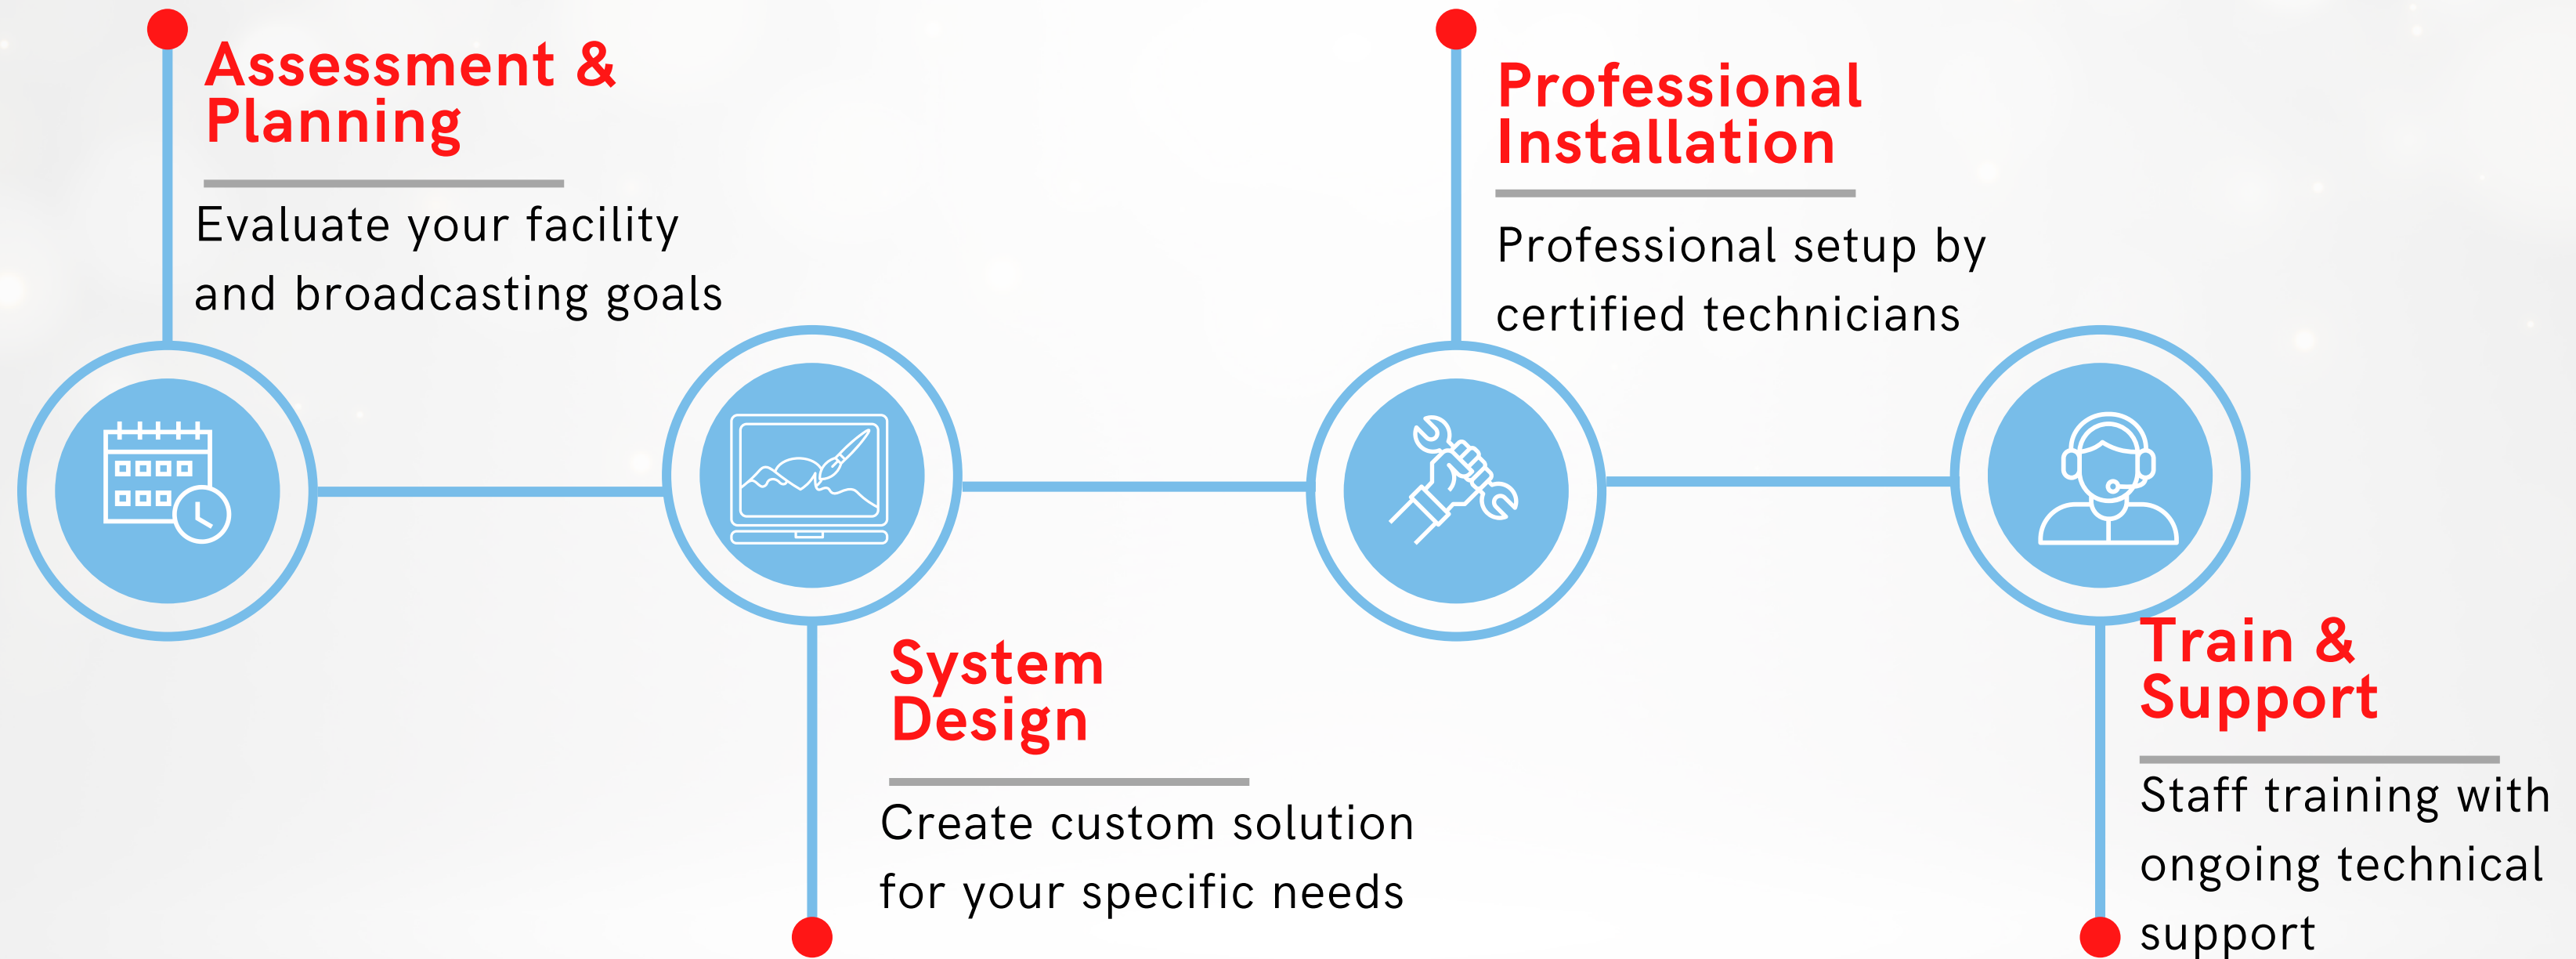

Includes microphones, mixers, headphones, audio software, and "On Air" systems — perfect for school radio, podcasts, and announcements.

TV Studio Equipment

We provide cameras, lighting, green screens, video mixers, and editing workstations — everything needed for professional school video production.

Implementation Process

WHY CHOOSE JAMIRO?

Over 10 years of
experience in
broadcast and AV
technology

Backed by local
support, training, and
service teams

End-to-end partner —
from design to
installation to
maintenance
